Sustainability at Pöppelmann.

In joint responsibility for tomorrow.

Our sustainability strategy.

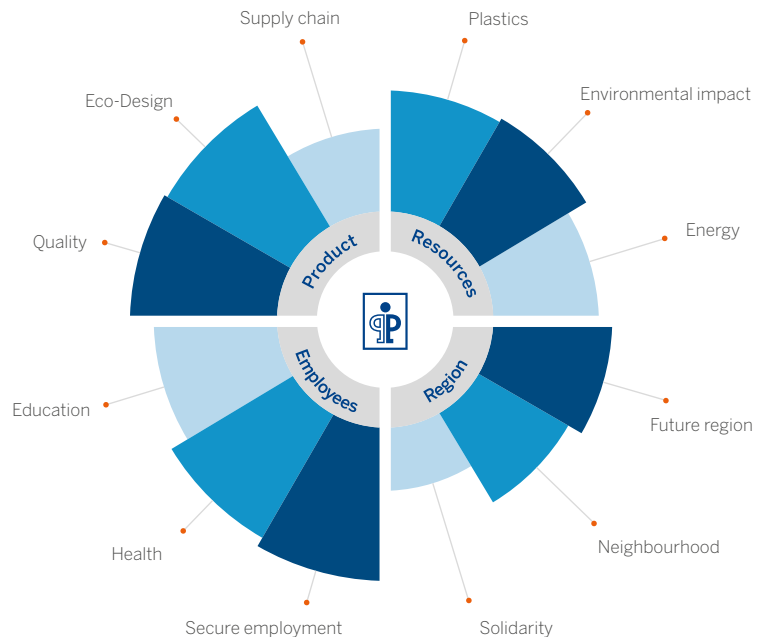

We are not looking for short-term business, but a long-term partnership that is profitable for all parties. That is how we have laid it down in our corporate policy – and that is how we understand sustainable management. This attitude is best described by the notion of “**responsibility**”. We assume this responsibility every day anew – for our employees and our products, for the resources of our planet and for the region which we call home.

The result.

We have identified four key fields of approach for our responsibility. They are mutually dependent, built on our corporate policy and thus express our fundamental values. In order to be able to define these four fields of approach more accurately, we have split them into three subject fields.

The entire **sustainability report** according to the Global Reporting Initiative (GRI) specifications is available online and can be downloaded from:

poeppelmann.com/sustainabilityreport

PRODUCT FIELD OF APPROACH

Long-term responsible solutions.

Quality, long-term usability and product safety are the basis of our innovative plastic solutions.

EMPLOYEES FIELD OF APPROACH

A dynamic and reliable partnership.

We offer fair working conditions, comprehensive work safety, health protection and continuous further training for everybody in the team.

RESOURCES FIELD OF APPROACH

Efficient use of resources.

We avoid the consumption of fossil fuels through the widest possible use of recyclables, with the aim of closing material loops.

REGION FIELD OF APPROACH

Strong together.

Our company decisions are intended to strengthen regional structures at the location.

Circular Plastics Alliance

Alliance for the recycling economy of the EU Commission. The signatories affirm their support for the objective of the EU Commission to use ten million tons of recycled plastic in new products by the year 2025.

New Plastics Economy

By signing the Global Commitment, Pöppelmann has committed itself, among other things, to significantly increasing the proportion of recycled plastic waste from the collection of recyclable materials for the production of plastic packaging on average by 2025.

Responsibility.

Drive. Challenge. Solution.

DRIVE

Our efficient plastic products ensure that the green sector around the world can work professionally, thus making the world greener, more colourful and tastier for consumers with flowers, plants, fruit, vegetables and herbs.

CHALLENGE

Plastic is currently facing big challenges as a material of the future. The risks are made the subject of many discussions while the opportunities are quickly overlooked.

SOLUTION

Together, we embrace responsibility: Our answer is **Eco-Design** – a central component of our company-wide sustainability strategy.

The correct answer for us is **Eco-Design** of plastic packaging. The Eco-Design of plastic packaging is intended to minimise the environmental impact of plastic packaging and the packaged goods over their entire lifespan. Optimisation approaches as part of Eco-Design include **material savings**, **reusable solutions** and **the use of recycled plastic** and also alternative materials.

Reduce

We reduce the use of materials through resource-friendly article concepts and efficient production processes.

Reuse

We work on the development of products that are intended for multiple use.

Recycle

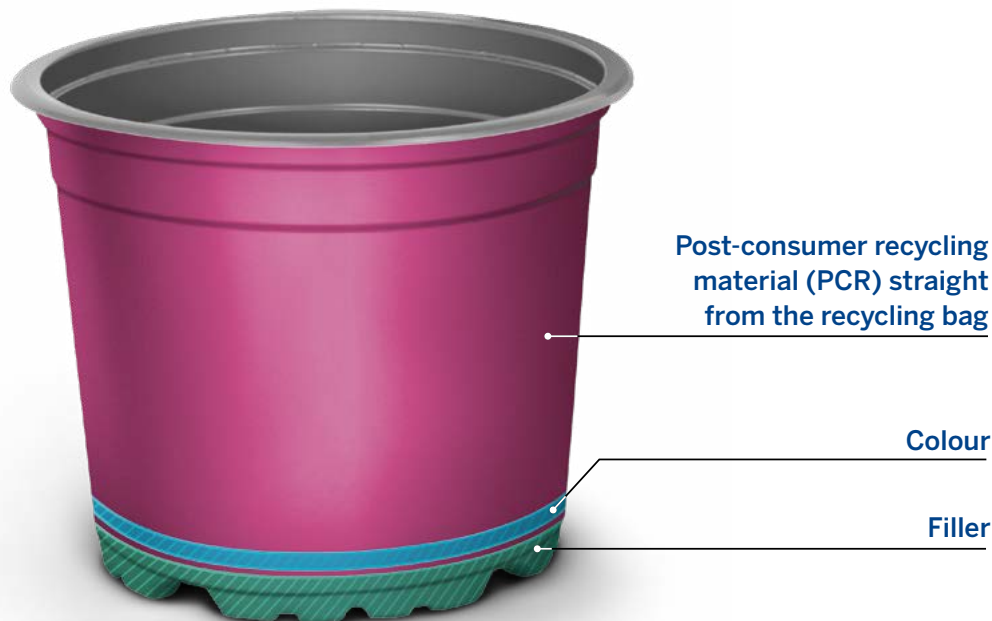

We develop trendsetting concepts to close material loops. That's why we launched the initiative PÖPPELMANN blue®.

PÖPPELMANN blue® |

100 % Recyclable Plant Pot,
Plastic Content 100 % Recycled.

Resource-saving plant pots made from recycled plastics.

Environmental and climate protection are becoming ever more important for consumers. The issue of resource conservation is one that is close to our hearts too. That is why the plastic for our plant pots in **Circular360** comes directly out of the recycling bin, the recycling bag or other domestic recyclable collections where it ends up again. The raw material loop is thereby closed completely. We call this endeavour PÖPPELMANN blue®.

Advantages from which not only you benefit.

- ⊕ The raw material loop is closed (closed loop).
- ⊕ The use of recycled plastics conserves fossil resources.
- ⊕ The demand for environmentally friendly and resource-saving products is growing rapidly.
- ⊕ Recycling-friendly design (100 % recyclable).

Award-winning and certified.

The RAL Quality Mark indicates the proportion of plastic that comes from the recycling bin, recycling bag or other domestic recyclable collections.

www.blauer-engel.de/uz30a

TEKU® plant pots of the initiative PÖPPELMANN blue® are certified with the Blue Angel for the use of recycled plastic.

PÖPPELMANN blue® |

100 % Recyclable Plant Pot,
Plastic Content 100 % Recycled.

This is how we close the raw material loop.

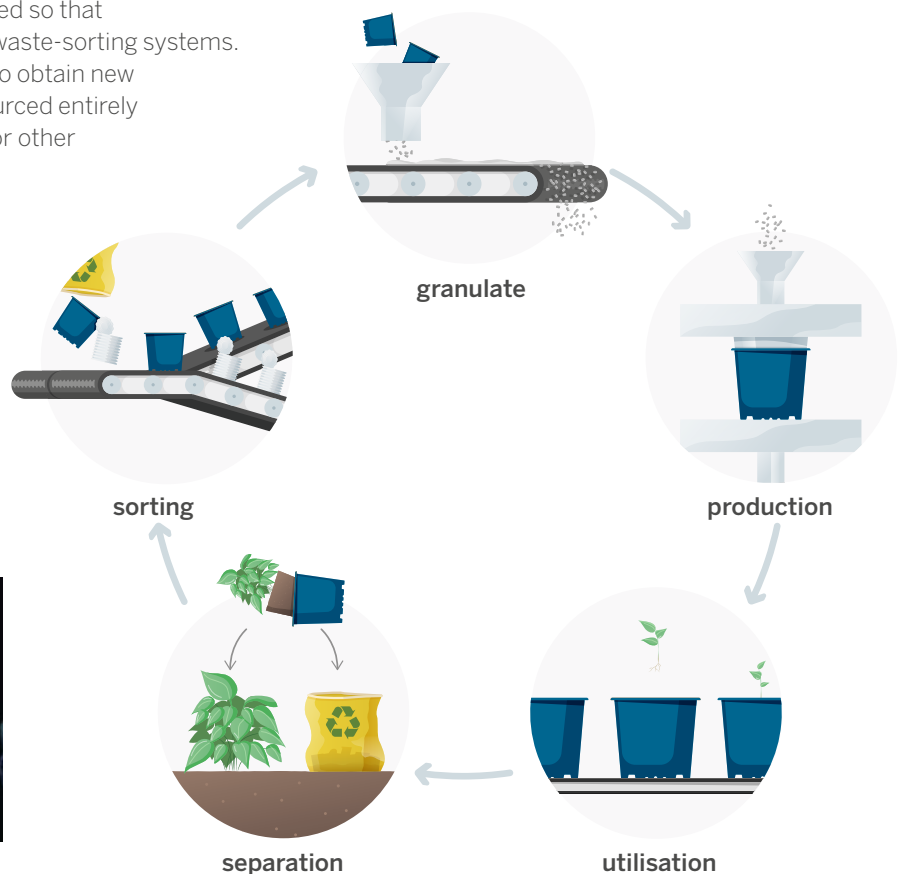

Plastic is a valuable raw material. Currently only about half of the plastic in packaging waste is reused in Germany. We want to increase this proportion and actively contribute to closing the raw material loop.

The plant pots in **Circular360** are designed so that the material can be reliably identified by waste-sorting systems. This material can consequently be used to obtain new Pöppelmann PCR granules, which are sourced entirely from the recycling bin, the recycling bag or other domestic recyclable collections.

We do it.
More resource-saving.

Watch the film:
poeppelmann.tv

Award-winning and certified.

The jury says: "Brilliant solution!
Minimal use of material, super
light from 100 % recycled material.
Closed Loop!"

The TEKU® products certified by the cyclos-HTP institute are 100 % recyclable in the German Dual Systems and in comparable domestic recyclable collections in various European countries.

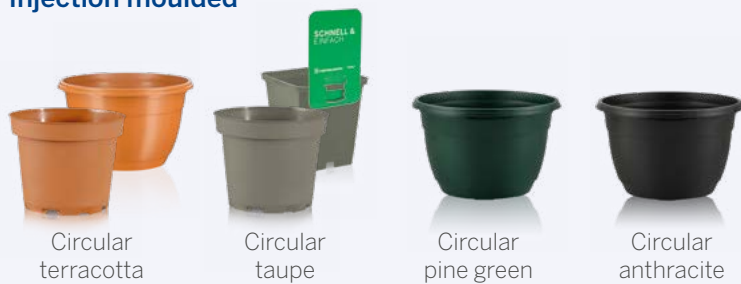

The Pöppelmann Effect: Real Circular Economy. The New Benchmark.

Circular360 ¹⁾

Inline method (Thermoforming)

Injection moulded

Characteristics:

- + PÖPPELMANN blue®
- + Circular Economy / Closed Loop
- + 100 % recyclable ⁵⁾
 - NIR detectable
 - Float-sink method
- + Made of
 - Plastic = 100 % PCR HW ²⁾
 - Colour (Masterbatch)
 - Filler
- + Certified
- + Printable

www.blauer-engel.de/uz30a

¹⁾ Use of PCR content and heterogeneity of the material leads to variations in gloss and colour.

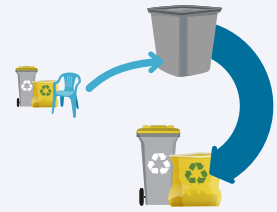

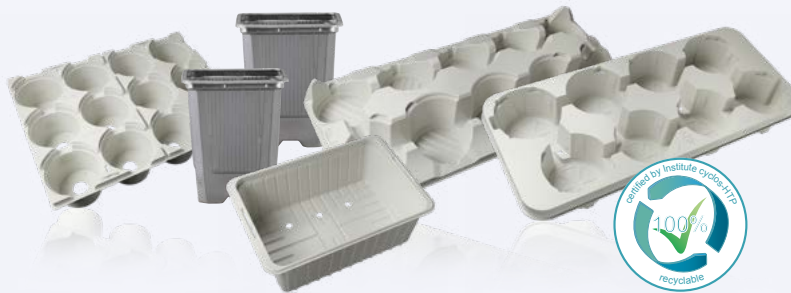

²⁾ PCR HW = Post-Consumer Recycling Material from the recycling bin, recycling bag or other domestic recyclable collections

The Pöppelmann Effect: Real Circular Economy. The New Benchmark.

PCR Recyclable ¹⁾

Characteristics:

- + 100 % recyclable ⁵⁾
 - NIR detectable
 - Float-sink method
- + Made of
 - Plastic = 100 % PCR ³⁾
 - Colour (Masterbatch)
 - Filler
- + Certified

www.blauer-engel.de/uz30a

Recyclable

Characteristics:

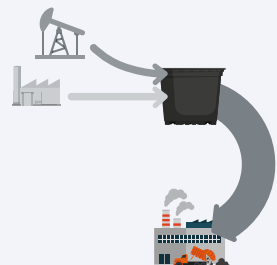

- + 100 % recyclable ⁵⁾
 - NIR detectable
 - Float-sink method
- + Made of
 - Plastic = PCR ³⁾ / PIR ⁴⁾ / Virgin material
 - Colour (Masterbatch)
 - Filler
- + Certified
- + Printable

Black

Characteristics:

- + Made of
 - Plastic = PIR ⁴⁾ / Virgin material
 - Colour (Masterbatch)
 - Filler
- + Printable

³⁾ PCR = Non-specified Post-Consumer Recycling Material
e. g. DE, F, DK, NL, AT, CH, NO, GB

⁴⁾ PIR = Post-Industrial Recycling Material

⁵⁾ Certified according to cyclos-HTP

MDF | COVERPOT

Integrated sight glass for monitoring the water level.

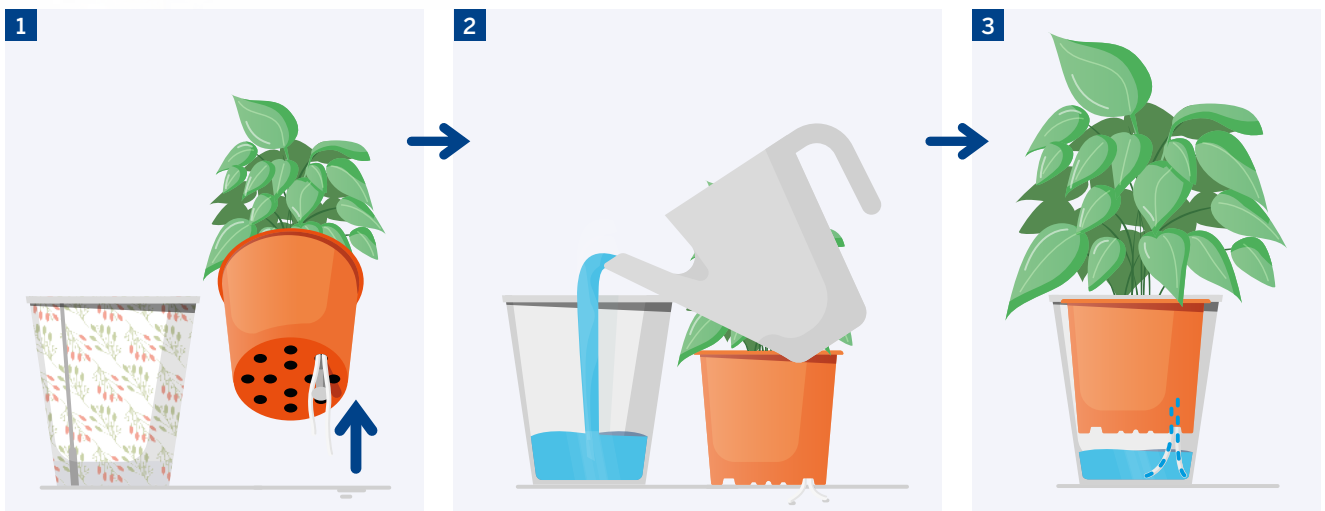

In combination with the watering stick, the effort for irrigation and care can be reduced.

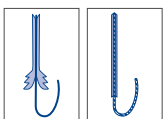

A water reservoir in the coverpot collects excess irrigation water.

Looking closer pays off. Discover the **TEKU® AddedValues** online: www.poeppelmann.com/teku

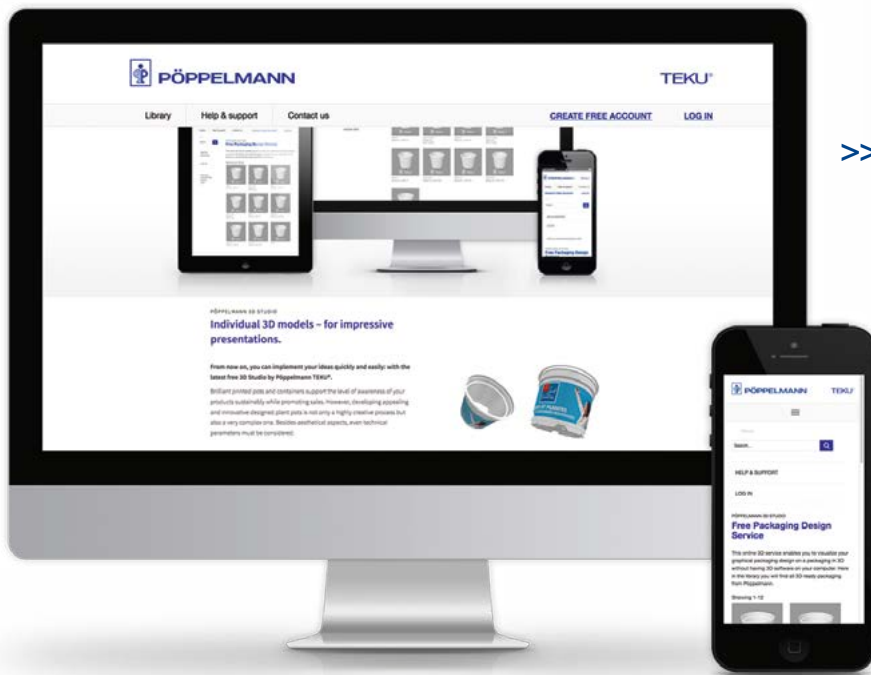

Item		Special features
WS 60+	300	Not suitable for MDF 7 D
FS 6/12	300	
WICK		Reel with 1,700 m

WS 60+ FS 6/12

Individual 3D models – for impressive presentations.

Bottom Design

Multi hole profile bottom

Thorough, fast irrigation and drainage as well as aeration on three levels:

1. Level with direct base contact and additional watering and drainage channels
2. Level with distance to the contact surface: for fast drainage and maximum aeration
3. Level with sloped drainage openings (internal side slits)

Profile bottom

Thorough, fast irrigation and drainage as well as aeration on two levels:

1. Level with direct base contact and additional watering and drainage channels
2. Level with distance to the contact surface: for fast drainage and maximum aeration

Multi-Hole Cross Bottom

Thorough, fast irrigation and drainage as well as aeration on three levels:

1. Level with optimum capillary drainage
2. Level with maximum distance to the contact surface, fast dripping drainage, maximum aeration
3. Level with sloped drainage openings

Bottom Design

Multi-hole star bottom

Thorough, fast irrigation and drainage as well as aeration on four levels:

1. Level with optimum capillary drainage
2. Level drainage via the centre hole
3. Level with maximum distance to the contact surface, fast dripping drainage, maximum aeration
4. Level with sloped drainage openings (internal side slits)

XI

XI-1

XII

Multi hole profile bottom

Thorough, fast irrigation and drainage as well as aeration on four levels:

1. Level with direct contact with the bottom: sloped drainage
2. Level with distance of 1.5 mm to the contact surface: optimum capillary drainage
3. Level with distance to the contact surface: fast dripping drainage, maximum aeration
4. Level with sloped drainage openings (internal side slits)

XIII

XIII-1

XIV

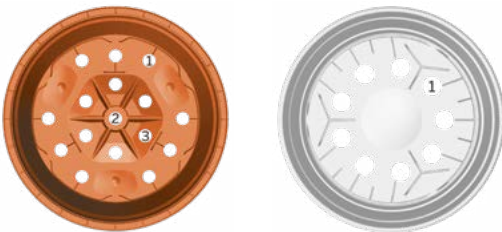

Multi Hole Bottom with high feet

Thorough, fast irrigation and drainage as well as aeration on three levels:

1. Level with distance to the contact surface: fast dripping drainage, maximum aeration
2. Level drainage via the centre hole
3. Level with sloped drainage openings

XV

XVI

Bottom Design

Step bottom with support function

1. Level with optimum capillary drainage through direct base contact or 1.5 mm distance to the contact surface
2. Level with drainage and aeration openings plus support function
3. Side slits in dome area: additional drainage and maximum aeration

XVII

XVIII

Multi hole profile bottom with central dome

Thorough, fast irrigation and drainage as well as aeration on three levels:

1. Level with direct base contact and additional watering and drainage channels
2. Level with distance to the contact surface: for fast drainage and maximum aeration
3. Level with sloped drainage openings (internal side slits)

XIX

Cross bottom

Thorough, fast irrigation and drainage as well as aeration on two levels:

1. Level with direct base contact and additional watering and drainage channels
2. Level with distance to the contact surface: for fast drainage and maximum aeration, punched bottom holes on two levels

XX

XX-1

Water overflow

The hanging basket series with overflow outlet offer plants a moisture reservoir

XXI

XXII

XXII-1

Bottom Design

Cross bottom

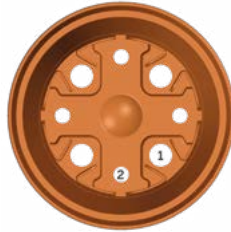

Thorough, fast irrigation and drainage as well as aeration on two levels:

1. Level with distance of 1.5 mm to the contact surface: optimum capillary drainage
2. Level with distance to the contact surface: for fast drainage and maximum aeration

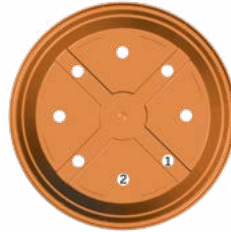

XXIII

XXIII-1

XXIII-2

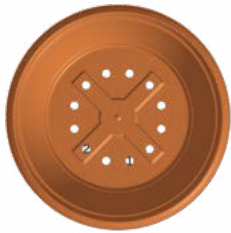

XXIII-3

XXIII-4

XXIII-5

Three hole bottom

Thorough, fast irrigation and drainage as well as aeration on one level.

XXIV

Eight hole bottom

Thorough, fast irrigation and drainage as well as aeration on one level.

XXV

Nine hole bottom

Thorough, fast irrigation and drainage as well as aeration on one level.

XXVI

The Company

Introducing a successful family-owned enterprise: Pöppelmann – A company you can trust.

Since 1949, Pöppelmann has developed five production sites with 700 injection moulding and thermoforming machines and extruders to become one of the leading manufacturers in the plastics processing industry.

“Made by Pöppelmann” quality is valued in over 90 countries worldwide. This includes a wide range of sectors: We supply the commercial horticulture with plant pots and cultivation systems and are also partners for numerous companies in the fields of machine and equipment engineering, the automotive, electrical, solar, food and beverage, chemical, pharmaceutical, cosmetics and medical industries, as well as surface engineering and the controls and instruments industry.

- 1** Plant I, Germany: Pöppelmann GmbH & Co. KG – Kunststoffwerk-Werkzeugbau, Löhne
- 2** France: Plastiques Pöppelmann France S.A.S., Rixheim
- 3** USA: Pöppelmann Plastics USA LLC, Claremont, NC
- 4** More than 2,500 employees worldwide stand for productivity, quality and service.

The Divisions

Pöppelmann KAPSTO®

Plastic protective elements for every application.

Pöppelmann K-TECH®

High-precision engineered injection-moulded parts.

Pöppelmann FAMAC®

Functional components and modern packaging.

The product and material information included in this catalogue are based on generally available information provided, for instance, by the raw material suppliers. This information does not take into account the different effects on our product that may occur under the actual use intended by the customer.

The information provided does not constitute any promise of quality or durability, guaranteed properties or quality agreements. The purchaser or user is not exempt from the duty of carrying out his own tests and trials to ensure that the product is suitable for the specific use intended by him.

Our general terms of delivery apply.

If orders include the printing or labelling of products, then the following additional conditions apply:

The customer will immediately check the templates or samples sent for correction and, if they are correct, issue print approval without delay.

The content, design and suitability of the printed image for the purpose of use intended by the customer are the sole responsibility of the customer, unless there are errors which first arose in the subsequent production process and for which the contractor is responsible.

In the case of colour reproductions in all manufacturing processes, minor deviations from the print template do not constitute defects.

The resistance of the printed products to exposure to daylight (lightfastness) is restricted in particular by natural influences. The guide values of our suppliers limit the lightfastness of the colours to 5–6 on the Blue Wool Scale. Due to the large number of possible external influences, the suitability for the purpose of use intended by the customer is to be determined by the customer through its own tests.

If the customer provides the contractor with texts, pictures, design and colour specifications and other data, especially brand names and/or company names, for the printing of products, then the customer ensures that it possesses the requisite commercial property rights and/or other rights and that the printing, duplication, delivery and/or use of the products printed in this way do not violate any rights of third parties or applicable statutory provisions, especially provisions relating to trademark, competition, environmental and foodstuff legislation, including provisions governing the required product information. The contractor is not obligated to check for such legal infringements.

The customer indemnifies the contractor, as well as its employees and board members, from all compensation claims and costs resulting from a violation of the rights of third parties or statutory provisions for which the customer is culpable, including any legal defence costs. The right for the customer to prove its innocence is reserved. § 254 of the German Civil Code (BGB) applies accordingly. Statutory liability claims remain unaffected. The contractor expressly reserves the copyright to its own texts, drawings, drafts, layouts, samples and data.

Disclaimer:

We reserve the right to perform modifications due to errors without prior notification. Illustrations are representative.

© Copyright 01/2020 – All content, especially the texts, pictures, photographs and graphics are protected by copyright. All rights, including duplication, publication, editing and translation, remain reserved.

Duplication – even in excerpt form – or making available to the public through online media is only permitted with our consent.
