ORANGE®

ANNUALS  
2025-2026

Order plants online!

# Our Webshop Benefits

Our easy to use webshop is made for your convenience.

- Real-time availability
- Fast order confirmations
- Adjust your orders
- Surplus sales
- Import orders via Excel
- Substitutes
- Growth Strategies

Using our webshop can save you a lot of time, because you order directly on availability and your order is confirmed within minutes. You can easily adjust your orders online.

We help you out with handy tools like providing substitutes during the ordering process, an order import tool via Excel and we provide growth strategies to optimize your production.

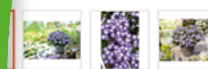

Please visit our website for more information or scan the QR code below. Here you can also apply for an account.

# About this year's Annuals catalog

We are pleased to present the Dümmer Orange annuals assortment in this catalog. We've fine-tuned the range for you, adding new products you'll love.

In order to always be able to offer you the best genetics, our varieties and series are continuously tested and the ranges are revised. As part of this revision, we have made some changes to our pelargonium series for the coming season. The interspecific Big EEZE varieties will be integrated into the successful **Survivor Idols** series. This results in a series of large-flowered premium pelargoniums in bright colors, with zoned green foliage. The Great Balls of Fire varieties will be added to the **Atlantic** series. The result is a diverse dark-leaved Peltatum series. It convinces with strong colors, is compact, early and best suited for small pots. **Green Idols** is merged with Green Series.

We bundle these early, compact zonal varieties under the Green Idols brand. Our Santana varieties are integrated into the **Sarita®** series. The interspecific varieties are heat-tolerant and have dark foliage and medium growth.

Of course, there are also promising new products for the coming season. **Grand Idols® Glory Days Red Orange Bicolor** is not only a special eye-catcher in the peltatum range, but also our candidate for the Fleuro Select Award. The successful Summer Bees dahlia series is now growing to five colors with **Summer Bees Red Star** and **Summer Bees White**.

There are also two very special new additions to the petunia range, **Sweetunia® Sparkling Bee** and **Sweetunia® Sparkling Night**, which are sure to attract everyone's attention. You will find them all and many more highlights in this catalog!

## Dahlia Novation®

Novation dahlias are early season and are a perfectly uniform series designed for grower programmability. All varieties flower within three days of another and have full, very densely branched plants that are ideal for high-density production. The large flowers form a strong contrast to the foliage and impress with both single and bicolours plays of colour.

# SUMMER BEES

FOR A LONG COLORFUL SUMMER

## Dahlia Summer Bees

The 'Summerbee' dahlia series brings summer all along the line: a reliable crop with high sales potential, a product with high ornamental value and a rich source of food for bees and bumblebees from summer to autumn. The varieties have a medium vigorous and well-branched upright habit and many single flowers in bright multiple colours.

## Pelargonium peltatum Atlantic

The Atlantic series is a medium compact and early-flowering *Pelargonium peltatum* variety, prized for its strong colors and reliable performance. This series combines the best and most robust selections from the Great Balls of Fire and Atlantic lines, now unified under the Atlantic name. The plants feature double blooms and a medium, compact growth habit, making them ideal for both small pots and larger containers. Their nice flowers and uniformity ensure high consumer appeal, while their manageable growth simplifies production for growers.

## Pericallis Mandala® Plus

This Mandala® Plus series delivers larger, longer-lasting blooms on naturally compact plants with exceptional branching. The dark foliage creates stunning contrast with vibrant flower colors, while short stems ensure perfect plant structure. Mandala® Plus offers outstanding drought and heat tolerance. The ultimate choice for growers seeking market-leading varieties that combine production efficiency with exceptional garden performance.

# Discover Intrinsa™ plants powered for a greener future.

Intrinsa™ brings advanced techniques through traditional breeding with the ambition of creating sustainable and economically viable plants for a greener future.

## Connecting the world

Intrinsa allows for greater accessibility of plant material produced from more countries worldwide for a broader availability to your garden.

## Transforming supply

Intrinsa advanced breeding techniques help make crops more reliable for greenhouse and nursery growers, ensuring a steady supply of your favorite blooms.

## Making homes and gardens greener

Intrinsa technology identifies unique DNA patterns with natural disease resistance, reducing pesticide needs using these innate genetics.

## Invest in the future

By investing in the Intrinsa™ brand

## Stronger, healthier plants

By advanced breeding technology

## True beauty comes from within

Plant power breeding by Intrinsa™

## Look for the icon

Look for the icon throughout this catalog to identify worry-free varieties for a more sustainable and economically protected future.

## Achten Sie auf das Symbol

Achten Sie im Katalog auf das Symbol, das die Sorten kennzeichnet, die Ihnen eine sorgenfreie, nachhaltige und wirtschaftlich sichere Zukunft bieten.

## Zoek voor het icoon

Zoek in deze catalogus naar het Intrinsa-icoon en ontdek welke rassen geschikt zijn voor een duurzamere en economisch zekerdere toekomst.

**DE Entdecken Sie Intrinsa™ - optimierte Pflanzen für eine grünere Zukunft.**

Intrinsa verbindet modernste Techniken mit traditioneller Züchtung, um nachhaltige und wirtschaftlich interessante Pflanzen für eine grünere Zukunft zu entwickeln.

**NL Ontdek Intrinsa™ - planten voor een groenere toekomst.**

Intrinsa verbindt de modernste technieken met traditionele veredeling, met als doel het ontwikkelen van duurzame en economisch interessante gewassen voor een groenere toekomst.

**FR Découvrez Intrinsa™ - des plantes optimisées pour un avenir plus vert.**

Intrinsa apporte des techniques de pointe à l'hybridation traditionnelle, l'ambition est de créer des plantes durables et économiquement viables pour un avenir plus vert.

**IT Alla scoperta di Intrinsa™ - piante potenziate per un futuro più verde.**

Intrinsa porta tecniche d'avanguardia nell'ibridazione tradizionale; l'ambizione è quella di creare piante sostenibili ed economicamente valide per un futuro più verde.

**ES Descubra Intrinsa™ - plantas potenciadas para un futuro más verde.**

Intrinsa aplica técnicas avanzadas a la hibridación tradicional con el anhelo de crear plantas sostenibles y económicamente viables para un futuro más verde.

**Cherchez l'icône**

Dans ce catalogue, cherchez l'icône identifiant les variétés sans souci, pour un avenir plus durable et économiquement sûr.

**Cercate l'icona**

In tutto questo catalogo, cercate l'icona che identifica le varietà che vi offrono libertà dalle preoccupazioni, con un futuro più sostenibile ed economicamente tutelato.

**Busque el icono**

Busque en este catálogo el icono que identifica las variedades que le ofrecen olvidarse de las preocupaciones, para lograr un futuro más sostenible y económicamente viable.

## Imagine a future... Where tobacco mosaic virus is a worry of the past

### EN The Solution

Resistant plant sources are identified by inoculating breeding material with the virus and testing the level of resistance under controlled conditions favorable for TMV development. Resistant plants identified through this method are then used as starting material in the breeding process.

### DE Die Lösung

Resistente Pflanzenquellen werden identifiziert, indem das Züchtungsmaterial mit dem Virus infiziert und der Grad der Resistenz unter kontrollierten, für die TMV Entwicklung günstigen Bedingungen getestet wird. Mit Hilfe dieser Methode können resistente Pflanzen erkannt und als Ausgangsmaterial für den Züchtungsprozess verwendet werden.

### NL De oplossing

Resistentie in planten kan worden geïdentificeerd door plantmateriaal te inoculeren (inenten) met het virus en vervolgens het resistentieniveau te testen onder gecontroleerde omstandigheden die gunstig zijn voor de ontwikkeling van TMV. Met de resistente planten die op deze wijze zijn geïdentificeerd, wordt uiteindelijk verder veredeld.

### FR La solution

Les sources végétales résistantes sont identifiées en inoculant le virus au matériel d'hybridation et en testant le niveau de résistance, dans des conditions contrôlées favorables au développement du TMV. Les plantes résistantes identifiées grâce à cette méthode

sont ensuite utilisées comme matériel de base pour le processus d'hybridation.

### IT La soluzione

Le fonti vegetali resistenti vengono identificate inoculando con il virus il materiale per l'ibridazione e testando il livello di resistenza in condizioni controllate che favoriscono lo sviluppo del TMV. Le piante resistenti individuate con questo metodo sono poi utilizzate come materiale di partenza nel processo di ibridazione.

### ES La solución

Las fuentes vegetales resistentes se descubren inoculando el virus en el material de hibridación y haciendo pruebas del nivel de resistencia en condiciones controladas que favorecen el desarrollo del TMV. Las plantas resistentes descubiertas con este método se utilizan luego como material de partida en el proceso de hibridación.

## Portulaca Cupcake

This vigorous variety delivers non-stop blooms from spring to fall with exceptional heat and drought tolerance. Naturally compact habit requires minimal PGRs, while its strong branching creates perfect groundcover density. Ideal for high-efficiency container production (10-12cm) or landscape plugs. Meets rising demand for low-water, pollinator-friendly annuals with outstanding shelf life and consumer performance. A profitable, climate-resilient choice.

# Scaevola Scala, Scala Cappello

A low-maintenance, drought-tolerant series with an extremely long bloom season. Cappello stands out with its naturally compact growth and excellent branching. These traits reduce the need for PGRs and make production more efficient. Uniform habits and strong flowering performance ensure a high-quality look at point of sale—without extra effort.
